Overview

Nostalgia Arab curates a wide range of content including digitized TV shows, commercials, bumpers, station IDs, online animations, memes, jingles, forum posts, and other digital culture pieces popular during the rise of the Arab internet scene and satellite television era. The website features archives from both pan-Arab broadcasters and local Egyptian channels.

History

The concept of Nostalgia Arab originated from online nostalgia communities across Facebook, YouTube, and Reddit, where users regularly shared clips from 2000s children's shows, anime Arabic dubs, and old Egyptian advertisements. Seeing the growing interest, a group of media enthusiasts and archivists decided to develop a centralized platform dedicated solely to archiving and streaming this media.

Development of the website began in late 2024, with beta testing conducted by invited users from nostalgia groups across Egypt, Saudi Arabia, Jordan, and Morocco. The official public launch occurred in August 2025, coinciding with the 20th anniversary of major milestones in Egyptian satellite broadcasting.
